

**Citizens' Climate Lobby
has hundreds of chapters
in over 75 countries
around the world creating
political will by:**

- Building relationships with elected representatives
- Building alliances
- Writing op-eds and letters to the editor
- Initiating letter-writing campaigns
- Offering public outreach events on climate change

We should too.

BE EMPOWERED

We empower individuals so that they experience significant growth in their own political and personal power, as well as discover and celebrate their capacity to make a significant difference in this world. Our volunteers break down partisan and ideological barriers by reaching out to key stakeholders to build positive, effective working relationships.

We have a proven theory of can and have been building institutional wisdom since 2010. **We are laser focused on building the political will for policies that will shift trillions of dollars towards a thriving and equitable planet while not burdening the taxpayer.**

You can make
all the difference
on the world.

Citizens' Climate Lobby
Lobby Climatique des Citoyens

Climate Income

Since 2010 we have been working towards legislation in Canada, the U.S. and around the world that would:

- Levy a federal fee on fossil fuels at the source: mine, well, or port of entry.
- Distribute all revenues to anyone who files a tax return in the form of a dividend cheque to offset higher energy costs and build public support.
- Include a border tariff adjustment to discourage businesses from relocating where they can emit more CO₂. This will encourage other nations to adopt equivalent carbon pricing.

Our plan will reduce demand for fossil fuels and make no/low-carbon energy sources more affordable. This will let the market determine the best alternatives for fossil fuels and frees the taxpayer from funding the multi-trillion dollar transition.

We did it Canada!

On October 16, 2018, Senator Grant Mitchell said to us, *"You are one of the most successful lobbying groups I have worked with because you are about to get what you lobbied for."*

On Tuesday, October 23, 2018, Canada announced it was going to enact a form of carbon fee and dividend. It needed some improvements, so we have continued to lobby our parliamentarians.

We are the best lobbyists that money can't buy

We were the group that lobbied over 1200 times for your Climate Action Incentive quarterly cheques

Canada's Pollution Pricing Policy is admired globally

We work closely with our colleagues in countries around the world. They wish their country would enact a carbon pricing like Canada's policy because it:

Reduces GHG pollution & income inequality at the same time

An article in Nature reported that if all countries adopt the necessary uniform global carbon tax and then return the revenues to their citizens on an equal per capita basis, it will be possible to meet a 2 °C target while also increasing wellbeing, reducing inequality and alleviating poverty. These results indicate that it is possible for a society to implement strong climate action without compromising goals for equity and development.
