# BUDGET RECOMMENDATIONS

Dear \_\_\_\_\_

As **Budget 2025** shapes Canada's economic future, it is imperative that we confront the main driver of our overheating planet: **fossil fuels**, whose health and economic impacts mount year after year.

Insufficient climate action could cost upwards of **\$178 trillion** by 2070 while a rapid net-zero transition could add \$43 trillion to the economy by comparison.

As Canadians experience an affordability crisis in the midst of a nation-building moment, we need to pick opportunities which will protect our future and our most vulnerable.
